

iTekLogic Features

-

Security/Encryption: iTekLogic keeps your data safe! To keep your information secure, backup files are encrypted using 256-bit AES file encryption and stored in not just one, but two data storage locations

-

File Compression for Efficient Use of Storage Space: iTekLogic understands your need to conserve bandwidth and storage space. File compression limits the amount of bandwidth needed to transmit your backup files and maximizes your storage space, while preserving the ability to easily retrieve your files.

-

Automatic Backup Preferences: To set up automatic online backups with iTekLogic, you will need to select the files to be backed up each time. These preferences are known as backup sets. With iTekLogic, you can program unlimited backup sets, allowing you complete control over each backup session.

-

Unlimited Revisions: iTekLogic allows you to store unlimited backup versions of the same file. With this feature, you have the ability to turn back time and restore a previous version of a document, undoing changes that would otherwise be permanent.

-

Round-the-Clock Accessibility: The point of backing up your files is so that the backups are there when you need them, of course. That is why iTekLogic makes your data available at any time of the day or night.

-

Logs and Reports: With iTekLogic's logs and reports, you can be sure your backups are successful. Check what was backed up and when, monitor storage usage, or sign up for email notifications after every successful backup.

-

Backup Available for Multiple Computers: iTekLogic offers plans for backing up mapped drives, multiple computers, and even multiple locations within the same account, making complex online backup as easy as 1-2-3.

-

Support for SQL and Microsoft Exchange: With iTekLogic, you can back up your important SQL and Microsoft Exchange databases using a secure encryption file method. iTekLogic also offers Additional Plugins for Microsoft Outlook and Office.

-

Free, Unlimited Customer Support: iTekLogic may be designed to be as easy-to-use as possible, but that doesn't mean we're not here for you. Every iTekLogic customer receives free, unlimited support.
