

Logs and Reports

iTekLogic's logs and reporting give you peace of mind.

Would you like to double check to make sure that your backups worked? If so, you'll like iTekLogic's comprehensive logs and reports. Find out what was backed up, when backups were completed, and other statistics, such as how much storage space you are at currently. iTekLogic even allows you to search the logs to find the information you want quickly and easily.

View reports online.

All logs and reports are displayed online, allowing you to keep tabs on your backups from any computer at any time. Your online account also displays information such as current storage usage. Features such as these keep you in the loop at all times.

Sign up for email notifications.

Do you want to know as soon as a backup session finishes successfully? iTekLogic allows you to sign up for automated email notifications that let you know every time a backup is completed. This option can be managed using the iTekLogic software when you are on your computer, or via your online account when you are away from the home or office.
